Title: Need to monitor works under MGNREGA as per Government guidelines and to repair embankments in Assam under MGNREGA.

SHRI RAMEN DEKA (MANGALDAI): The quality of works under MGNREGA is very poor in Kamalpur, Rangiya and Nalbari in Mangaldoi Parliamentary Constituency. There is no proper system to monitor works of MGNREGA to check whether the works are being done according to the norms of D.R.D.A. The officials of D.R.D.A generally avoid District Level Vigilance meetings and Member of Parliament who is the Chairman of the vigilance committee.

In view of this, I urge upon the Hon'ble Union Minister for Rural Development to institute an inquiry into MGNREGA works of the above mentioned places. Further District administration should be strictly instructed to convene vigilance meetings as per guidelines of Govt. of India.

I urge upon the Government to institute an inquiry into the quality of construction and allotment of I.A.Y of above mentioned places. I appeal to the Central Government to take up repairing works of embankments after monsoon seasons under MGNREGA. Almost all embankments in Assam are in dilapidated condition. This will besides providing jobs to the local people will act as protection from the floods.
